

**Energy Climate Action Day: Wednesday, February 4**

# Get Energized

**Did you know?** In New York City, energy use in buildings is the largest source of greenhouse gas emissions that cause climate change.

That's why we save energy in both big and small ways. Simple actions like turning off lights and unplugging appliances when we're not using them can really make a difference!

Join us on February 4 to explore ways to save energy at school and beyond.

**Two Ways  
NYC Public Schools  
Are Reducing Energy  
Related Emissions:**

**1 Switching to Clean, Renewable Energy**

129 solar projects have been installed on school buildings, with more on the way.

**2 Improving Efficiency**

Lighting and mechanical systems are being upgraded to use less energy.
