

Vision Care Providers for Children in New York City

Schedule regular eye exams for your child. When vision problems are diagnosed early, treatment can be more successful. Regular checkups should start between 6 and 12 months old — no child is too young for a full exam if something seems abnormal. Contact your own eye doctor or one of the facilities below for an appointment.

Most types of insurance, including Medicaid, will cover the cost of a full vision exam and at least one pair of glasses. For help finding a provider, call **311** or 844-NYC-4NYC (844-692-4692).
