# Family Guide to the School Quality Reports: Snapshot

## What is the SQR: Snapshot?

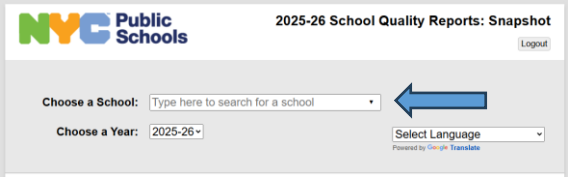

The School Quality Reports (SQR): Snapshot helps you find key information about New York City Public Schools (NYCPS). The report has four categories: School Description, Instruction and Performance, Safety and School Climate, and Relationships with Families. When available, ratings help show a school's strengths and areas for improvement.

NYCPS collects information to understand how well schools serve their students. Each year, NYCPS asks families of students in grades 3-K through 12, teachers and staff, and students in grades 6-12 to participate in the NYC School Survey. NYCPS also tracks results like test scores and graduation rates. The SQR: Snapshot brings this information together in one place and includes links to more detailed reports.

## How do I access the School Quality Reports: Snapshot?

The School Quality Reports: Snapshot is available online:

1. Go to tools.nycenet.edu/snapshot
2. Type the name of any NYC public school into the search field
3. Select the school from the drop-down list.

## How can I use the School Quality Reports: Snapshot?

Once you select a school in the search bar, you can:

- View the school's Overall School Ratings on the School Description tab, when available.
- Find out more about how the school performed by visiting the tab for each category.
- Print the entire report at once using the "Print" button.
- Translate the report into another language by using the Google Translate button at the top right of the page.
- View the report on your phone, tablet, or computer.

## Where can I get more information about schools?

The SQR: Snapshot includes results from selected NYC School Survey questions. View the NYC School Survey results on the Panorama Education platform. You can use the SQR: Dashboard to explore multi-year performance data with graphs and comparisons.

## How can I share feedback about this tool?

Share your feedback using the School Quality Reports Feedback Form.
